

# Productivity options in agriculture to improve profitability and sustainability

Tuesday 30 September 2025, 10am-3pm  
Oxley Shire Hall, 1157 Green Street

Join us for an engaging and practical session focused on unlocking productivity gains in beef and sheep farming systems

This practical day will focus on a small number of high-impact levers that can help farm managers make the most of their resources. **Cam Nicholson** will speak on topics including grazing system design, improving animal fertility, optimising turn-off timing, emissions reductions and strategies to boost overall herd performance.

We'll also explore the role of technology in decision-making, with **Optiweigh** representatives on hand to demonstrate equipment and share insights.
